INSTALLATION

Customer Information: The information in this installation instruction is intended for use only by skilled technicians who have the proper tools, equipment, and training to correctly and safely add equipment to your vehicle. These procedures should not be attempted by "do-it-yourselfers."
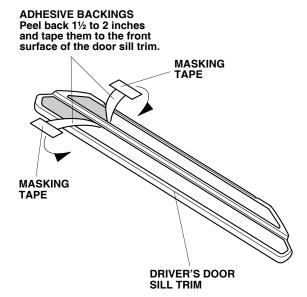

NOTE:

• Do not damage the paint finish.

• This kit should be installed only if the ambient air temperature is 15°C (60°F) or above.

• To allow the adhesive to cure, do not wash the vehicle for 24 hours. Please advise the customer.

1. Open the driver's door. Measure and attach a piece of masking tape to the driver's side step as shown.

FRONT

ALCOHOL SWAB

DRIVER'S DOOR SILL
Clean with the alcohol swab.

2. Using one alcohol swab, thoroughly clean the door sill where the driver's door sill trim will attach.

3. Peel back approximately 1½ to 2 inches of the adhesive backing from each outer adhesive strip, and tape the ends to the front surface of the driver's door sill trim.
NOTE: Check the back of the driver's door sill trim for the markings, and make sure to install the correct door sill trim.
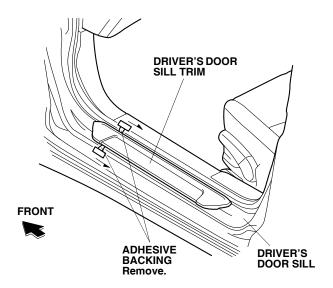

ADHESIVE BACKINGS
Peel back 1½ to 2 inches and tape them to the front surface of the door sill trim.
